

DAF for Koch Foods

The Koch Foods Project

When Koch Foods needed to build a chicken processing plant that required a new wastewater treatment facility in Morton, Mississippi, they called on BCI. We installed screens, conveyors, floating mixers, aeration equipment, DAF's, and chemical feed systems with all the associated piping, valves and instrumentation.

Our Mission and Vision

Building Crafts, Inc. is a leading regional firm in the construction of water and wastewater treatment facilities. We achieve this by applying innovative and effective construction methods as well as providing a safe and rewarding work environment for our employees.

Your Best Interest First

Since 1972, clients throughout the mid-western, eastern and southern US have relied on Building Crafts, Inc. for cost-effective construction of water and wastewater facilities. We provide clients with a full range of treatment plant services including design/build, construction management, general contracting, facility maintenance and repair.

Focusing on Food & Beverage

Nearly forty years of experience in the water and wastewater treatment industry has allowed BCI to prove time and again that our exclusive focus on water treatment solutions makes us an invaluable business partner for the food and beverage industry.

Services

- Construction Management
- Design/Build
- General Contracting
- Maintenance and Repair

Our focus on the water and wastewater treatment industry has allowed BCI to become the industry leader in our field. We are able to offer the most economical solutions without sacrificing efficiency or quality.

- During construction, we use value engineering of the treatment processes to ensure that the best/most cost-effective technologies are applied. Regular team meetings are held to ensure all issues are addressed proactively while construction proceeds.
- Integrated communication and coordination systems are implemented to prevent schedule conflicts and minimize disruption to operations of the existing plant.
- BCI offers customized maintenance services to provide quick and economical repairs and upgrades.

Design/build by BCI for pre-treatment plant additions for Nestle Prepared Foods.

Design/build for General Mills by BCI to treat process water for non potable reuse.

Wastewater pre-treatment improvements for Koch Foods completed by BCI.

“BCI exercises the best follow-up procedures to ensure quality. They are constantly communicating with everyone on the project to make sure things are going properly. While finishing on time and under budget, they still seem able to handle any challenges that come up. Their experience in the field definitely shows.”
