Water and Wastewater Treatment Experts MUNICIPAL DIVISION

Our Municipal Experience Makes a Difference

Nearly forty years of experience in the water and wastewater treatment industry has allowed BCI to prove time and again that our exclusive focus on water treatment solutions makes us an invaluable business partner for municipalities throughout the mid-western, eastern and southern United States.

**Northern Kentucky Sanitation District 1 Storm
Water Pump Stations Upgrade**

“BCI was very easy to work with and paid close attention to details. They were quick to foresee possible issues and prevent them from becoming problems. The people we worked with from BCI were very experienced, qualified individuals.”

*–Len Bauer, Supervising Engineer,
Metropolitan Sewer District of
Greater Cincinnati*

**Town of Plainfield, South Wastewater
Treatment Plant**

“There was an incredible steel price increase over the life of the project and BCI came to the table with ideas to help keep things on budget. I definitely felt that we were all on the same team. It was great to do a project that I was both proud of and felt I could trust the contractor to do a good job and come in on budget.”

*–Tim Belcher, Town Engineer,
Town of Plainfield*

**Metropolitan Sewer District of Greater
Cincinnati Centrifuge**

“Fair, honest and very professional is how I would describe BCI. They always have their customer’s needs in mind. The Northern Kentucky Water District has done a number of projects with them and BCI has always gone above and beyond what a general contractor usually does.”

*–Jim Dierig, Project Manager, Northern
Kentucky Water District*

Services

- Construction Management
- Design/Build
- General Contracting
- Maintenance and Repair

Our focus on the water and wastewater treatment industry has allowed BCI to become the industry leader in our field. We are able to offer the most economical solutions without sacrificing efficiency or quality.

- During construction, we use value engineering of the treatment processes to ensure that the best/most cost-effective technologies are applied. Regular team meetings are held to ensure all issues are addressed proactively while construction proceeds.
- Integrated communication and coordination systems are implemented to prevent schedule conflicts and minimize disruption to operations of the existing plant.
- BCI offers customized maintenance services to provide quick and economical repairs and upgrades.
